

## SQUARES GAME

This game would work with ANY set of spellings that you have to learn .

### SQUARES

The object of this game is to make more small squares than your partner:

- ⇒ Find an adult to play against you.
- ⇒ Use a 4x4 grid of dots like the one below, drawn in your book or on scrap paper.
- ⇒ Player one reads out a spelling from the list, crosses it off and player two must write it down.
- ⇒ If player 2 spells the word correctly, they connect two adjacent dots on the grid to make a line. If not, they do not do anything.
- ⇒ Player 2 then reads a word for the list for player 1 to spell.
- ⇒ Each player is trying to make more small squares on the grid than their partner—drawing the final line to complete a square makes it yours.
- ⇒ The winner is the person with most complete squares at the end of the game.
